

REMARKS

The above amendment corrects the typographical error in second patent number given in the paragraph at page 3, lines 23-26 of the specification. This error also caused the wrong patent to be listed in the first Information Disclosure Statement. Therefore, a Supplemental Information Disclosure Statement is simultaneously being submitted under a separate paper to properly place the correct reference before the Examiner.

The above amendment also corrects the typographical error in value of the pressure given in the kPa units of measure in the paragraph at page 10, lines 4-22 of the specification. The pressure is given in both psig and kPa units of measure. However, a pressure of 1,500 psig is roughly equivalent to 10,350 kPa, not 13,500 kPa, obviously a transposition of the digits.

No new matter has been added. Entry of this amendment to correct the specification is courteously requested.

Respectfully submitted,

UOP LLC
